month and 5 cents a line each week part of week
after.
Starting advertisement—50 cts a line for 3 months.
FRANK OLIVER, — PROPRIETOR.
EDMONTON BULLETIN, APRIL 26TH, 1895.

Accounts for printing and advertising for the past three months become due after this issue, and will be rendered. Prompt settlement is requested.

BUTTER.

The manufacture of butter is necessarily an important branch of the agricultural industry in all parts of Northern Alberta, and at this season, when the manufacture of butter on a large scale is about to commence, is a suitable time to discuss the merits and demerits of the different systems. Right here is where the difference between practical and theoretical farming comes in. The end of theoretical farming is the production of large quantity and high quality. The end of practical farming is to make production pay; and the profits on production depend on many things besides the quality and quantity of the article produced. A high price for a certain product will admit of a certain expense in production, while a lower price means that unless the expense of production can be reduced production must cease or be carried on at a loss, although the quality and quantity be the same in both cases. This is the change from the conditions of last year which confronts the butter industry of Northern Alberta. A year ago the prospects were favorable for good prices and a brisk demand for creamery butter, and a fair local sale for dairy butter. To-day the price is low and the demand slack for creamery butter with the prospect that creamery will crowd dairy butter out of the local market. It is unfortunate that this should be the case; but when it is the case it is just as well that all interested in the production of butter should realize it, so that they may take measures accordingly. It is not desirable that the production of butter in this region should cease or be lessened, but it is absolutely necessary that every one should clearly understand the conditions which govern the butter industry at the present time, so that false hopes of profit shall not encourage reckless expenditure. Last summer there were four creameries in operation in Northern Alberta, —one near Edmonton, one at Battle River, one at Red Deer and an extensive one at Innisfail. A certain amount of capital has been invested in these creameries and a certain amount of experience has been gained in connection with them. Three of them at any rate will be running during the coming season and will be competing in the home market with dairy made butter. There is no reason why dairy butter cannot be as good for local use as creamery butter, —in many cases it actually is, —but there are many reasons why it cannot be as suitable for export. No matter how widely the creamery system is extended there must still be a great deal of dairy butter made; and instead of dairy and creamery fighting each other to bring down prices below cost of production in the local market, the dairy should be of a sufficiently good quality to command the local market while the creamery must be produced cheaply enough to allow of its being exported. The sum of the matter is that all who cannot afford the time or who have not the conveniences for making first-class butter in their own dairies will either have to patronize a creamery or cease making butter for sale. This means that the creamery system must be extended far beyond its present limits of four creameries in an area 100 miles square, or a very important source of wealth in this region will be left undeveloped. It is no secret that none of the four creameries operated last season paid their way. This being the case there is very little chance of the number being increased, unless a change in the system of working is adopted which will enable them to pay. In all cases

the great source of loss was the cost of hauling the milk to the creamery or to the separator, and this cost was occasioned by the scattered nature of the settlement; it being impossible to get enough cows within a suitable area with which to operate a creamery. While this difficulty may be overcome in some cases it goes without saying that throughout the greater part of the country it exists and will exist for many years, and that so long as milk has to be hauled to the factory or creamery station so long the creamery business in Northern Alberta will be far short of what it should be for the benefit and development of the country. This idea of hauling all the milk is begotten of the separator craze, and is not a necessity to the successful operation of a creamery. If the cream were separated by deep setting, in all cases in which the farmer—or two or three neighbors jointly—could not afford a private separator, only the cream need be gathered, a much larger number of cows could be made to contribute to the one factory and the cost of hauling would be reduced to a minimum. No doubt the separator system is nicer, handier and more easily managed by the creamery than the deep setting system, but it is little if any more productive of butter, taking one part of the season with another, and unless the farmers will take their milk to the separator free of charge, by deep setting is the only way in which creameries can be made to pay in this thinly settled country and the only way in which the full development of the butter industry can be secured.

SWEDISH COLONIZATION.

C. O. Swanson, Swedish immigration agent, came up from Wetaskiwin on Thursday's train and returned south on Friday. Mr. Swanson opened the season's campaign by bringing in several car loads of Swedish settlers to the country east of Wetaskiwin a few weeks ago. The people were of Swedish birth but all had lived a number of years in the Eastern States and were possessed of some means. They came west for the purpose of getting farms. They have located chiefly in townships 43 and 44 range 22 south and east of Battle River and on each side of Red Deer lake. There are now about 100 Swedish families in these two townships. Mr. Swanson paid his first visit to Edmonton in October of 1891 and commenced immigration work the following winter. He brought through his first party of Swedish immigrants to Wetaskiwin in 1892. Chiefly as the result of his efforts there are now about 1,000 people of Swedish origin settled around Wetaskiwin. The principal settlement is in the townships mentioned, namely 43 and 44 range 22, and it is being extended into the townships south of these. There is besides settlement in 47-21 and 22 at Bittern lake, and in 44, 45, 46 and 47 in range 23. There are also a few settled nearer Wetaskiwin. At present they come from New York State, New Jersey, Connecticut, New Hampshire, and Vermont, with some from Michigan and Minnesota. Although most of them have been in other employments while living in the States they were all originally farmers. The majority are doing very well and are well satisfied with the country and with their prospects. So much so that Mr. Swanson expects that before many years there will be more Scandinavians than people of any other nationality in Northern Alberta.

IMMIGRATION.

Ottawa Citizen: Official reports received at the department of the interior corroborate the statement that immigration into Northern Alberta is proceeding upon an extensive scale. Mr. R. L. Alexander has forwarded to the department reports covering the months of January, February and March, during which he has inspected, he says, every train between Calgary and Edmonton.

In that period 427 settlers arrived in the district, bringing with them forty-one carloads of stock and effects, at a value of \$45,100.

He has received double the number of letters of enquiry from the United States as compared with the last year, and he is of the opinion that there will be an early and large movement to the Canadian Northwest. The winter has been delightful. There are no means of making a comparison with the same period last year except for the one month of March, regarding which Mr. Alexander says:

As compared with the same month of 1895, I find that there came from the other provinces of the Dominion in 1894, 123 settlers, from the British Islands 12 and from other European countries 24. While for the month of March there came from the other provinces of the Dominion only 57 and from the British Islands only 5, and from the European countries none this month, but from the United States I find that in 1894 there came 113 souls and for March 1895 total double that number, namely 226. The total number of arrivals from all parts in March, 1894, was 276, and for the same month this year 318.

Taking the number of cars of live stock and settlers effects for 1894 I find the total number of cars was fourteen, of which eight came from the United States, and the other six from the provinces. This year the number is thirty-one of which twenty came from the United States, and eleven from the other provinces of the Dominion.

"I think the class of settlers so far this season are better than last year. It will be noticed by the above comparison that while there is only an increase of a little over 15 per cent in the number of settlers, yet there is over 100 per cent of increase of cars of stock."

CORRESPONDENCE.

LEDCU, April 22.

EDITOR BULLETIN.

Sir:—In your issue of the 18th inst., your correspondent here says something about the roads. He states that townships 49 and 50 have been established as statute labor and fire districts; and that it is the committee's duty to call a meeting and elect an overseer. I wish to say that the committee have nothing to do with electing an overseer. Returning officers were appointed and meetings called to elect overseers. But the people did not attend, so the reports were sent in accordingly. Since then there has been some kicking. I would like to know how much of a road can be opened up with only two days work from the few settlers there are here; and more than that one side of a township will be containing wheat until the country is more settled up and in better circumstances and then levy a road tax and do the road work at once.

HONEST CITIZEN.

Commercial: If an improvement in prices is an indication of better times, prospects ahead should be bright. Several staple commodities have recently experienced almost a remarkable advance in prices. These are crude petroleum, hides and beef cattle. The advance in these raw materials will affect other lines, as, for instance, the big advance in hides will affect leather, boots and shoes and leather, manufactures generally.

Edmonton District.

THE TERRITORIAL EXHIBITION TO BE HELD AT REGINA, N. W. T.

Will commence on Monday, the 29th of August, 1895, and close on Wednesday, the 7th of August, 1896.

The dates have been shortened to meet requests made by various intending exhibitors.

Bona fide exhibits will be conveyed free by the railways.

Railway rates from Edmonton to Regina will be \$16.70 for the round trip, good until August 15th, corresponding reduction from all other points along line of railway.

R. B. GORDON, Secretary.

SPRUCE GROVE.

Yesterday at noon a party of mounted police passed through on their way to Edmonton, having three prisoners in charge who were implicated in an affray in the west end of the settlement in which it appears A. V. Caldwell had his skull fractured.

A meeting for the purpose of electing an overseer for statute labor and fire district in township 53, range 27, west of 4th meridian, will be held at the house of Jacob Miller of 4-53-27. Daniel Brox returning officer.

Mr. Geo. Sutherland, of this place, will commence his duties as mail carrier on the Edmonton and Stony Plain mail route on May the first.

Mr. Miller, of 9-53-26 lately from Dakota, has built a blacksmith shop and is prepared to do all kinds of job work in that line. Horse shoeing and repairing agricultural implements a specialty. Mr. Miller will supply a long felt want in the settlement.

April 25th, 1895.

WHITE FISH LAKE.

Hunting has been profitable during the winter. Of late moose and bear have been killed. Pike, large and fat, also suckers, are being caught in the outlet stream of the lake.

The great mill is to be moved from the farm instructor's to a point three miles away on Good fish lake.

Spring work has commenced.

The new compulsory law as to the attendance of Indian school children has had good effect on the reserve. Notwithstanding the drain on attendance through the industrial school the average for the last quarter at White Fish Lake, Good Fish Lake and Saddle Lake was 13, 25, and 15 respectively, and a central school between the two former lakes is required, where 26 pupils can be secured.

The latest report is that farm instructor De Gear is to be moved from White Fish Lake to a reserve near Battleford. If this change takes place the community loses farmer, postmaster, kind neighbor and highly respected citizen all in one man. Mr. De Gear and wife will wear well as friends and neighbors wherever they may be located, and have the heartiest good wishes of whites and Indians on the reserve.

WETASKIWIN.

On Sunday last Mr. Downswell had his stable, four horses, a cow and two calves burned. He was boiling feed and went to sleep, and the fire started from where the feed was being boiled.

The census is being taken by the N. W. M. P. in this district.

W. Macdonnell & Co's. store at Bear's Hill had a narrow escape from fire on Tuesday, as the main fire can within a few feet of the store, burning a pile of wood but doing no further damage.

The lumber for the new bridge across the Pipestone arrived by Monday's train and the bridge will be completed in about a week.

Anton Dranger was married on Monday to a lady whose name your correspondent did not learn, by the Rev. Mr. Andrus.

B. F. Boyce left for Calgary on a business trip on Tuesday.

H. T. Telford, of Ladino, is in town to-day looking up seed grain.

It is rather cold, and snowing some to-day.

Prairie fires were raging in this vicinity for several days but have died out.

April 25th, 1895.

OLDS.

Two cars of government seed grain, one of wheat and one of oats, arrived here last Thursday, and for the following two days Mr. Thompson, land inspector from Calgary, was kept bustling issuing it to the farmers. Over one thousand bushels have been distributed to about seventy applicants.

Mr. Grogan, of Calgary, is staying at the St. Georges Hotel.

W. R. Charley of Devil's Pine lake, was in town last week on a visit to G. B. Batho.

At last the farmers took a notion with regard to the creamery, and building operations are now progressing favorably.

George Brewster passed through town last week with two hundred head of horses from Morley. He is driving them north for sale.

W. W. Davidson, of the Massey Harris Co., was in town last week in the interest of his firm.

George Cloakey has started the manufacture of washing machines, which are now in great demand.

W. D. Scott, of Calgary, representing the Great West Life assurance, was in town last week.

A meeting of the Botanical society was held in the room over Briggs' store on Saturday last. T. N. Willing, secretary of the Botanical society for the Northwest Territories, spoke on the best methods of preserving specimens of flowers and grasses, also showing some of his beautiful examples in this direction. He also stated that societies have been formed along the line between here and Edmonton. Meetings will be held here every Saturday.

G. P. Thompson was down from Innisfail to see the race Tuesday.

G. B. Batho has moved into his house on Third street.

Sergeant Forester, N. W. M. P., is hard at work taking the census here. The returns have to reach Ottawa by May 15th, so it will keep him busy to get through by that time.

"In God we trust. Nebraska, or best," was the motto on the wagon of some disgruntled emigrants going south on the trail the other day, to the dis of observation with their fellow country men in Nebraska.

Rev. C. R. Ship, from Innisfail, preached in the Baptist school house on Sunday evening. Rev. W. J. McKay taking his place at Innisfail. Rev. P. Naimith also preached here in the evening.

A car of settlers and effects from Michigan arrived here on Monday's special train.

A car of lumber also arrived here Monday for G. B. Batho, who is starting in the lumber business.

Great excitement prevailed here on Tuesday afternoon. J. H. Walker, J. A. Capley, and J. C. S. Rayden got up a horse race, each paying five dollars, the lot to go

to the winner. The distance was quarter of a mile. A good start was made, but it was easy to see that Walker's horse would be too much for the others. At the finish, Walker's was a good rod ahead.

April 25th, 1895.

POPLAR LAKE.

A large meeting of patrons of industry was held in the school house on Monday evening. Several new members were balloted for and accepted.

Mr. Ball, contractor, has commenced operations on the new school house.

This township 54, range 24 has been proclaimed a fire and statute labor district. Jas. McDiarmid has been appointed returning officer for taking the votes for appointing an overseer.

April 26th, 1895.

INNISFAIL.

The weather here has been fine and warm, and seeding is nearly all done. Last night however a change came. Heavy clouds drove up from the south west, the atmosphere grew appreciably colder, and it threatened snow. None however has fallen up to noon to-day. As the ground has become very dry since the spring opened, rain or snow would do a great deal of good in the way of starting the grain, at present dormant in the ground, and it is to be hoped either one or the other will fall shortly.

Much interest is shown here in the trials of C. McCormick's new gopher exterminator. It seems to do its work well. By means of fans contained in a galvanized iron case, air is forced through a tube holding burning sulphur and charcoal. The nozzle of this tube is inserted in the gopher burrow, and the noxious fumes or driven down into the homes of Gopher & Company with fatal results. Several burrows have been dug up after this treatment with the exterminator, and in every case the occupants were found dead. This machine may go a long way to solve the gopher question. Mr. McCormick is having a number made for sale.

The Lander & Ross livery barn has been successfully moved to a new site near Mr. J. A. Wilson's blacksmith shop. It was one of the first buildings erected on the south side of the railway track, before any of the present streets were opened up, and did pioneer service. Mr. R. Wynn superintended the moving, assisted by Mr. Kemp, and deserves great credit for shifting the position of such a large ungainly building with so little jarring or racking.

Several entertainments are spoken of. The A. O. U. W. are to have one of their pleasant dances in Archer's hall to-morrow (Friday) and a second Presbyterian social at Mrs. Constantine's, got up by the young ladies of the congregation, is to be held, we believe, in the near future.

A couple of "horse" accidents occurred here lately. Mr. C. Johnstone, living at Mr. Calvert's, got a very serious kick in the groin, and may not recover, and Mr. Flanagan got his nose broken by a blow from a rail driven from the gate of a corral, out of which a bunch of horses were rushing. Mr. Flanagan may have his beauty spoiled by the blow, but no other ill effects are feared. We trust Mr. Johnstone will also get over his injury. He is attended by Dr. Henry George, who is unrelenting in his attention.

Messrs. H. Page and H. Raikes spent a few days in town.

Mr. and Mrs. Wilson, of Horse Shoe lake, were in town last week.

A number of commercial men were in town last week. Messrs. Clark, Scott, Low and other gentlemen.

Messrs. Staples, Karr and Wilson have built a nice little stable for McCallum and Douglas.

Mr. Simpson, M. L. A., returned from Calgary last week, and Mr. West from British Columbia.

Our hills and hollows once more refresh our eyes with a tinge of green.

Everybody is busy gardening.

A big kick is being made to get our M. L. A. to bonus the creamery from local funds. As the small sum he could spare could do the creamery no good, and is badly needed on the roads, the desire is being received with a good deal of opposition.

Snow is in sight, and may fall any minute.

Some parties are making a row over what they allege is "big-jaw" beef, sold by a butcher in town. He and the owner of the steer give an unqualified denial to the charge. It would be well for some people to remember that "those who live in glass houses should not throw stones," and that the scriptural injunction is to "first cast the beam out of thine own eye."

April 25th, 1895.

Hudson's Bay Company

(Incorporated 1670.)

Beauty and grace are prominent features in all efforts of nature, and art but follows and copies nature in the production of beautiful and graceful fabrics for the adornment of the person.

As times are hard and money scarce this spring a special effort is being made to combine those desirable features with cheapness, and a very pretty dress can be obtained for a small price.

We wish to call special attention to a wide range of cotton dress goods, new, fashionable and pretty.

TOWN COUNCIL.

Wednesday, April 24th.

Present, Mayor Wilson and Councillors Kelly, Strong, Bellamy and Cameron.

Communications were received from Ed. C. Dawson, offer to erect a bridge; department of public works, Hon. T. M. Daly and Sir Macdonald Borel, respecting bridge; C. M. Woodworth, respecting road for the Watson family; B. Ross, respecting grade to the lower ferry; Sir William Van Horne, telegram regarding spur track.

Bellamy—Kelly moved that a reply be forwarded to C. M. Woodworth stating that the council do not see their way clear to assist the applicants mentioned in his communication.

Strong—Bellamy. That the communication from Donald Ross be filed.

Strong—Bellamy. That the mayor and councillors Cameron and Kelly be a committee to procure the necessary information regarding spur track as requested in Sir William Van Horne's telegram.

On motion of Bellamy—Cameron. By-law No. 99 amending by-law 97 was read three times and passed.

Bellamy—Kelly. That the clerk be instructed to have the ferry tariff printed for use on ferries.

Strong—Cameron. That the clerk be instructed to insert notice in the Edmonton Bulletin stating that the dog tax by-law will be fully enforced.

Strong—Cameron. That the clerk be instructed to request the solicitor to inform the council in what manner the speed of bicycling can be regulated.

Cameron—Strong moved the adoption of the report of the finance committee.

FORT SASKATCHEWAN SPRING SHOW.

The annual spring show of the Fort Saskatchewan agricultural society was held on Friday last. There was a fair turnout of exhibitors and spectators, but the fact that seeding is on earlier than usual has kept down the attendance at all the spring shows. In imported heavy draughts, G. Hutton's "Woodland Chief" took first; J. C. C. Bremner's, 2nd. C. Paradis, "Ringer" was also shown. In Sulkies, W. J. Suffer's "Gold Dust" took first prize. There was one exhibit in general purpose horses. In Canadian bred heavy draughts, W. Walkers horse took 1st. In carriage horses M. McCutley's "Blackthorn" took 1st and J. Graham's horse second. In roadsters J. Biddle's, "Chief Good Enough" took 1st and W. H. Stephens' "Jimmy Mitchell" 2nd. In Sulkies Wm. Clark's took 1st for thoroughbred Durham and J. Graham 2nd.

NAMA.

Seeding is well advanced and a large amount is being put in.

Mr. Payzant has rented Mr. D. B. Wilson's farm in addition to the one mentioned in a former issue. He has a large force at work putting in the seed. Mr. Payzant rented a farm here last year and the fact that he has rented two farms this year proves that his experience in farming in the Sturgeon district has been of a satisfactory nature.

Andrew Wilson is smiling over the advent of a brand new baby at his home. What this country needs is increased population; and we believe that the man possessing the qualifications entitling him to run a baby buggy is away ahead of the bicycle rider, when the advantage to the community is taken into consideration.

Rev. G. J. Blewitt received the painful news of the very sudden and unexpected death of his father a short time ago and consequently found it necessary to leave at once for Ontario.

April 26th, 1895.

GENERAL NEWS.

Kaslo B. C., which has been down on its luck for some time, is looming up again. The Slokan Prospector which was published at Three Forks has moved to Kaslo.

Victoria B. C. exported gold last year to the amount of \$109,351, and fare \$25,828. Vancouver exported gold \$181,336, fare \$30,781, lumber \$18,182 and gold \$10,619.

Cruide oil is now worth \$1.40 to \$2.00 a barrel at Pittsburgh, Pennsylvania. In 1892 it was selling at 50c. The present advance is 75c a barrel over what it was at New York.

Commercial. It is proved that the production of the great eastern oil territories in Canada and the United States is decreasing below the limit of demand, it will further the development of the oil regions of northwestern Canada. A great oil territory is supposed to exist west to the north of Edmonton. If surface indications can be relied upon, we have a vast oil territory in the north, and the product of this territory may be required sooner than we may have imagined.

An Ottawa despatch to the Free Press says: The census of the Territories now being taken by the Mounted Police on their rounds will be the basis for the increased representation in the commons if, and as the census shows, increased population entitles any district to another member. That is the nature of the amendment to the act mentioned in speech from throne. The clause in the speech dealing with the C. P. R. lands is to enlarge the area in which the company may take their land in block for irrigation purposes.

Free Press: Mr. Hallett went as far west as Edmonton on his tour of observation. He says the rush of immigration to the Edmonton district reminds one of the old days in Manitoba. The trains are not only crowded with new settlers, but the trails are alive with caravans and stock droves heading their way northward. The settlement is spreading so fast that home-

teachers are now locating fully forty miles east of Edmonton.

Mr. Hallett is away under the mark. Settlers have gone out 90 miles east of Edmonton.

Free Press Ottawa correspondent on the Manitoba school question says: That Borell has been in sending the remedial order in the way it was sent every one now agrees. Some people down here do not quite understand the position and many have asked me, supposing that as citizen of Winnipeg I should know something about what the Manitoba legislature will do. I have replied that the Manitoba legislature has no option. The order is absurd on the face of it; one that no class in the whole Dominion expects to be accepted in such shape, and that the awkward way in which the government has handled the matter leaves the Manitoba people only the one course, viz. to decline to act on the order received. "Will they then make some counter proposition?" is the next question asked. No one can safely prophesy until he knows, but my answer has been that I do not suppose the Manitoba legislature will do anything. They have been told to do an impossible thing and they can't and won't try to do it. The fault is with the people who asked them and the responsibility of finding the solution is with Ottawa. It would be idle for the Manitoba legislature to send out balloon proposals, even if they were inclined to do so, without knowing what has been promised by the Ottawa government or what would satisfy anyone. The correspondent is Mr. St. John, manager of the paper.

ELECTION ADDRESS.

To the electors of Alberta.

GENTLEMEN.—As the nominee of the convention of Alberta liberals which was held recently at Calgary, and having been assured of a strong support by the patrons of industry in Northern Alberta, as well as at the solicitation of a large number of independent conservatives in this part of the country, I have the honor to offer myself as a candidate for the representation of Alberta in the Commons at the approaching general election. The stand which I take with the full knowledge and consent of those who have tendered me their support is that of an independent as to party, but not as to principle. On the main question at present at issue between the liberal and conservative parties, I understand that the organizations and individuals tendering me their support have done so with the wish and expectation that I would and will so far as lies in my power support the policy of a tariff for protection, which is the declared policy of the present government; on the ground that the protective policy discriminates unjustly against the western producer in favor of the eastern manufacturer.

Although holding strongly with the liberal party and also the patron organization on this point, I have not bound myself to either of these because I believe that the first duty of the single representative of so great a country holding such great possibilities as this district of Alberta, should be to use his every energy for the further development of this country and the realization of these possibilities; as he can not if he is to be subject to restraint by the exigencies of any party. This constituency has had party representation during the past eight years,—has been represented by a member of the party in power then and now. If the results have been satisfactory, that principle should be continued. If not it should be changed. It is because I believe that this system of party representation has been gravely injurious to this district that I have consented to make the personal sacrifice involved in my candidature, and because, so far as I knew, no other person was likely to come forward to advocate these or like views.

In a region so vast and varied as Alberta it would be impossible for any man at any time to define all the points of policy that would affect each locality, therefore I do not attempt to do so here. I hope from time to time, however, in the course of the contest, to have the opportunity to discuss fully with the electors at most of the principal centres of population, all matters that may come up for discussion, in whatever shape they may appear. That such a vast region, having such a large population and such important interests should be accorded only one representative is as plain a case of injustice as is required to show the glaring failure of party representation to secure the people in even their simplest rights. The matter of railway extension and railway rates particularly in the north and the question of irrigation in the south seem to be the great questions affecting the interests of the district with which parliament will from time to time have to deal. I need not point out that while these are vital questions to Alberta, they are not party questions at all, and it is all the more necessary that your representative should be in a position to advocate your interests in regard to them in parliament without party hindrance even if he has to do it without party support.

Speaking generally I may say that I will support a policy of development for Alberta and while I will not bind myself to ask for favors for any section or interest I will bind myself to do all in my power to see that each section and every interest receives fair and equal treatment.

In conclusion I will say that although I have no personal interest to serve or ambition to gratify by entering upon this contest, yet having entered upon it in good faith I shall do all I can to win, and ask for the active assistance of every man who believes that the success of the principles which I have been selected to advocate would be in the interest of this constituency and of the country.

Respectfully Yours,

FRANK OLIVER.

EDMONTON, March 4th, 1895.
